Queuless- A Smart Online Management System

User Management

Equivalence Partitioning (EP)

EP Partitions

Partition	Description	Example
P1	Valid existing user	`user01@gmail.com`
P2	Valid user format but user does not exist	`unknown@gmail.com`
P3	Invalid email format	`user01gmail.com`
P4	Empty input	`""`

Final Designed Test Case — EP

Field	Details
Test Case ID	TC-QUEULESS-EP-20-01
Test Scenario	Verify that Admin can search and view an existing user using a valid email address
Preconditions	1. Admin is logged in. 2. User Management page is accessible. 3. `user01@gmail.com` is registered in the system.

Test Steps	1. Navigate to User Management. 2. Enter `user01@gmail.com` in the search field. 3. Click Search.
Input Data	Email = `user01@gmail.com`
Expected Result	System displays the corresponding user's information successfully.
Actual Result	To be completed during test execution
Status	Pass / Fail
Remarks	Tests representative value from P1 – Valid & Existing User partition.

Staff Management

BVA Boundary Table

Test Value	Meaning
1	Just below minimum
2	Minimum boundary
3	Just above minimum
49	Just below maximum
50	Maximum boundary
51	Just above maximum

Final Designed Test Case — BVA

Field	Details
Test Case ID	TC-QUEULESS-BVA-21-01
Test Scenario	Verify that the system rejects a staff name below the minimum allowed length
Preconditions	1. Admin is logged in. 2. Staff Management page is accessible. 3. Add Staff form is open. 4. Other required fields contain valid data.
Test Steps	1. Navigate to Staff Management. 2. Select Add Staff. 3. Enter a 1-character staff name. 4. Enter valid data in the other required fields. 5. Click Save.
Input Data	Staff Name = `A` (1 character)
Expected Result	System rejects the staff name and displays a validation message indicating that the minimum length is 2 characters. Staff record is not created.
Actual Result	To be completed during test execution
Status	Pass / Fail
Remarks	Tests minimum − 1 boundary using BVA.
